Ridging
Timbering
Netting
Patching

S M Master Thatchers have been thatching roofs around the UK for over 25 years. All of our thatchers have served a real 5 year apprenticeship in all aspects of this truly skilled craft both in traditional and modern ways.

We work in all the three main materials:

Water Reed
Wheat Reed
Long Straw

We have worked on some of the largest roofs in the UK including a complete thatched village in the West of Ireland.

Thatching experience comes not only from working with all the available materials but also taking note of regional variations in thatching techniques which can vary from county to county.

We work closely with the National Bursary Scheme, funded by the National Lottery, to train young people in the rural community.
